

Symbol	Description
<i>Spaces, Maps & Point Clouds</i>	
$\mathcal{M}_{\text{pri}}, \mathcal{M}_{\text{obs}}$	2D prior sketch map and local observation map
$\mathcal{P}, \mathcal{P}_i$	Visible point cloud in the current frame, and its subset in the i -th azimuthal bin
X_r	Robot pose node
<i>Descriptors & Registration</i>	
$\mathbf{I}^p, \mathbf{I}^o$	GeoContext descriptors for the prior and local maps
$\mathcal{X}_{\text{cand}}$	Set of candidate locations sampled on the traversable regions of the prior map
$\mathbf{f}^p, \mathbf{f}^o$	Low-frequency components of the descriptors extracted via FFT
$\mathbf{R}, \mathbf{t}, s$	Rotation matrix, translation vector, and scaling factor
$\mathcal{T}_f, T$	Set of fine-registered transformations, and each transformation with confidence score
<i>Guidepoints & Viewpoints & Nodes</i>	
$\mathcal{G}, \tilde{\mathcal{G}}, \tilde{G}_i$	Original prior guidepoints, transformed prior guidepoints and the i -th transformed prior guidepoint
$\mathcal{V}, V_i$	Set of sampled local viewpoints and the i -th local viewpoint
$\mathcal{V}_{\text{iso}}, \mathcal{V}_{\text{target}}$	Sets of isolated local viewpoints and target local viewpoints
<i>Costs & Objectives</i>	
$L(\cdot, \cdot)$	Searched path length between two nodes
$C_{\text{risk}}(i)$	Risk score evaluating the expected extra travel length for the i -th viewpoint group
$J_{\text{urg}}(i)$	Urgency score for prioritizing the visitation of the i -th viewpoint
